Ribtec carries out a continuous program of product improvement and safety awareness. Specifications are subject to change without notice, although all details are correct at the time of going to press. Ribtec products may be produced with a different trim level than originally specified. All dimensions are +/- 3%.

Please note that performance of your boat depends on engine size, propeller selection, trim settings, payload distribution and operating conditions. Refer to sections within this manual and within your engine owner's manual to obtain the best performance from your Ribtec.

Trailers

Ribtec trailers are available for the full range of Ribtec boats, and are set up specifically to aid launch and recovery.

The following come as standard:

- Rod operated brakes
- Lighting board
- Multi-roller launch and recovery
- Hub & brake flush facility

Electronics

We fit Garmin and Icom as our chosen electronics. Fitted to the Riviera Series are GPSmap 4008 or 550s and the IC-M411 VHF/DSC.

The GPSmap 4008 is a full multi-function display. The 8" VGA screen is capable of being used as a chartplotter, fish-finder and radar. Garmin's G2 Vision cartography unlocks the full potential of the 4008 giving navigation charts, fishing charts a 3D view both above and below water. Garmin's unique Auto Guidance route calculation gives an unrivalled ease of use. This product has full integration with the Icom 411 VHF features.

Yamaha

Yamaha lead the world in high performance marine engines. Their range of four stroke outboards is the most complete line-up of engines offering performance, reliability and durability.

Engine models used in Riviera Series range:

- 655SX - F115, F150
- 740SX - F200, F250
